

Syl-la-bles

The Game that Encourages You Think Big!

The object of Syl-la-bles is to come up with the longest and most difficult (correctly spelled) word that begins with the letter on the space you land on. The longer the word, the more points you score.

Each letter has a point value and each syllable is worth 50 points. Do you risk misspelling a longer word and score zero points, or do you play it safe and spell an easier word to ensure you can score points?

The strategy is up to you and the possibilities are endless.

Land on the Thesaurus or Spelling Bee squares and score 500 points if you can answer correctly!

The first person to achieve a set amount of points wins.

Fun for all ages and abilities, the difficulty of the words is up to each individual playing the game.

A great educational game as well, as kids can learn syllables, spelling, synonyms, and math!

Syl-la-bles is the game for all ages that encourages you to think big.
